

## GIT USEFUL COMMANDS FOR DAILY WORKFLOW

---

### TO MAKE A CHANGE

```
git checkout main
git pull
git checkout dev2
git pull
```

<Do Changes>

```
git status      (Currently in dev2)
git add .
git commit -m "Commit Message"
git push
```

---

### AFTER FEW CHANGES, TO MERGE INTO "main" BRANCH

```
--> Go to Browser, go to Github, log in to your user and go to the repo's main page.
--> Goto/Select dev2 branch.
--> Click on "Compare and Pull Request" button.
--> Check whether the arrow mark above is like "main <---- dev2".
--> Give clear and unique Title and Comments including date.
--> Click on "Create Pull Request" button.
```

<The Merge is being done by Someone>

```
git checkout main
git pull
git checkout dev2
git pull
```

---

### TO PULL OTHERS' WORK FROM "main" TO PERSONAL BRANCH

(These Commands Can be Done at any Time. Eventhough didn't "add" or "commit" or "push")

```
git checkout main
git pull
git checkout dev2
git pull
git pull origin main
git push
```

---
